SafeGuard DVR iPhone/iPod/iPad and Android App Setup instructions

For Apple devices search for DIVIS on the App Store. For Android search for DIVIS on Google Play.

Select and install the app with the icon below and the name 'DiViS DVR Viewer'

*The screens displayed are from the iPhone, however the Android screens are similar.

Select the Divis icon to launch the app.

If the app has not been setup before you will be prompted with this dialog. Select done and the app will advance immediately to the setup screen.

Otherwise, see the screen below.

When the app launches select the setup button at the top right corner.

Scroll down to see the bottom portion of the screen

Select 'Add Site'

1. Enter your site information:
2. Site Name: Any descriptive name for your site.
3. Address: The IP address or URL for your site. The URL will be in the format [yourserial#].safeguarddvr.com
4. Channel: The total number of channels your DVR supports, 4 , 8, 16 or 32 (if unsure call for support)
5. Port : 3000
6. Username and password: 1 and 1 (default). If you have customized the login, use that instead.
7. Select 'Settings' at the top left when finished.

The name of the site you created earlier will appear in this list here. Select the site and a checkmark will appear next to it.

Select 'Site Connection Mode' at the top left to save and return to the previous screen.

Select 'Settings' to save and return to the main screen.

After a few seconds you should see an image from camera 1 of your site.

Slide right to see more cameras or select the screen split button below.

Favorites

If you have setup several sites, you will find it convenient to add each site to your favorites list for quick access.

***NOTE: You must connect to each site by selecting them from the 'Single Site' list described above and follow the steps below on each connection.
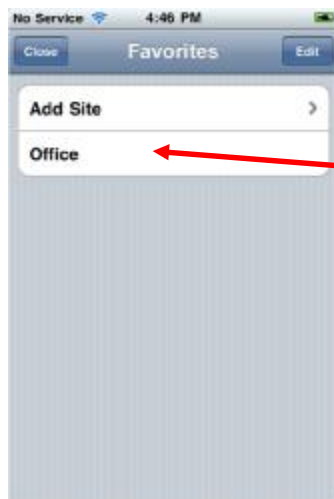

Select 'Favorites'

Select "Add Site'

Enter a name for the site you are currently connected to.

This name can be the same as the site name.

Select 'Favorites' at the top left to save and return to the previous screen.
